

GUINNESS WORLD RECORDS™

GWR FOR BUSINESS BRIEFING QUESTIONNAIRE

APPLICANT DOSSIER

HRL International Pvt. Ltd.
Official Record Claim 2026

To help us deliver the most impactful solutions for your event, please share a few key details. This will enable us to tailor our approach and align our services with your campaign objectives, ensuring the best possible outcome. Below is the completed submission dossier for **HRL International Private Limited**.

CLIENT & PROJECT OVERVIEW

Company / Brand Name	HRL International Private Limited
Email / Phone	hrlinternationalprivatelimited@gmail.com +91 72040 65662
Website / Social Channels	• Live Simulation Twin: https://hrlpavan.github.io/hrl-v12-engine/ • Official GitHub Repo: https://github.com/hrlpavan/hrl-v12-engine • Corporate Hub: https://hrl-brand-seo.vercel.app Instagram: @hrlpremiumstudio / @hrlfx
Event format	Hybrid Global Launch & Live Technical Adjudication: Physical verification & code-audit presentation at Sahyadri College of Engineering & Management (SCEM Campus, Mangaluru, India) + Global 4K 60FPS WebGL Livestream & Interactive Simulator.

OBJECTIVES & SUCCESS CRITERIA

What is your primary objective? (e.g. brand awareness, media coverage, lead generation, community building)	Establish an official, unprecedented global engineering milestone in Computer Science & Computational Simulation; showcase India's Tier-2 deep-tech capabilities on the international stage; build worldwide brand authority for HRL International Private Limited.
What does success look like? Quantitative KPIs (Attendance Numbers, impressions, ROI, sales etc.) Qualitative KPIs (brand perception, quality of press coverage etc.)	Official Guinness World Records™ certification as the first 9-language polyglot procedural 3D V12 digital twin running in a browser with zero audio samples; extensive worldwide coverage across technology, software, and automotive media; academic peer adoption. • 100% Pass Rate on automated cryptographic audit (verify_world_record.py across all 9 language cores). • 10,000+ live stream attendees & interactive simulator sessions during launch week. • 5,000+ GitHub stars & forks on the open-source repository. • 10,000,000+ combined impressions across LinkedIn, X/Twitter, YouTube, and national tech media. • Global positioning of HRL International as an elite deep-tech software engineering pioneer. • Rigorous peer validation from automotive engineering and academic faculties (Prof. V. Ganesan IC Engine thermodynamic models). • High editorial praise and features in premier international technical journals.
Key Message(s) you will be communicating (Top 3–5 messages you want audiences to remember)	1. Zero External Audio Files: 100% mathematical sound synthesis directly from fluid mechanics and acoustics (Heywood, Benson, Munjal models). 2. 9-Language Polyglot Core: Unifying C, Rust, Zig, Go, Python, TypeScript, JavaScript, HTML5, CSS3 with zero dynamic heap churn. 3. Academic Rigor: Exact 48 valves, 60° V12 firing order (1-12-5-8-3-10-6-7-2-11-4-9), and Prof. V. Ganesan P-V cycle thermodynamics. 4. Cryptographically Audited: Automated SHA-256 certificate verification (WORLD_RECORD_VERIFICATION_CERTIFICATE.json). 5. Indian Deep-Tech Frontier: Architected and delivered from Mangaluru, Karnataka by HRL International.

TARGET AUDIENCE

Overarching demographics of your audience (age, gender split, profession, etc.)	Ages 18–50; Software Engineers, Systems Programmers (C, Rust, Go, C++), Automotive/Mechanical Engineers, 3D Graphics/WebGL Developers, STEM Students, and HPC Researchers (approx. 70% Male, 30% Female / diverse global engineering demographic).
Location of audience (local, national, international etc.)	Global — Primary: India, United States, United Kingdom, Germany, Japan; Secondary: Global open-source developer communities.
Interests/ Behaviours of your audience (what motivates them to engage with your event?)	High-performance low-level computing, GPU rendering, mechanical simulation, luxury automotive engineering (Rolls-Royce V12 heritage), procedural audio DSP, open-source technology breakthroughs.
Are you targeting an existing or a new audience?	Both: Leveraging our existing 2.5M+ creator reach while expanding into a new global audience of enterprise CTOs, engineering leads, automotive OEMs, and academic researchers.

EVENT DETAILS	
Event Date and time	October / November 2026 (or mutually finalized date with GWR Commercial Adjudication Team; Q4 2026).
Venue Name & Address	Hybrid Venue: • <i>Physical:</i> Sahyadri Campus & HRL International Engineering Lab, Adyar, Mangaluru, Karnataka 575007, India. • <i>Virtual:</i> Global Interactive WebGL Portal (https://hrlpavan.github.io/hrl-v12-engine/).
Capacity of venue	Physical: 350+ on-site attendees (faculty, engineering students, adjudicators, press). Virtual: Scalable to 50,000+ concurrent interactive live participants.
Ticketing details (free/paid etc.)	Free Open-Access: Public technical demonstration, livestream, and open-source verification portal.
Key event features (e.g. speakers, performers, VIPs, activations, etc.)	• Live execution and projection of <code>verify_world_record.py</code> cryptographic audit in front of official adjudicators and academic witnesses. • Interactive 60 FPS WebGL CAD demonstration of the 48-valve V12 engine. • Real-time sound synthesis inspection proving 0 audio files via browser Web Audio API analyzer nodes. • Sir Henry Royce 1906 Coin Balance vibration stability test on the digital twin. • Technical keynote by Claimant Pavan Kumar Sadashiv.

BRAND & CREATIVE DIRECTION	
If available, please can you share a copy of your brand guidelines with us?	Available upon request: HRL International Brand Guidelines & Apple Pro-inspired minimal dark-mode design system (#000000 pitch black, #0071E3 electric blue, #30D158 verification green, glassmorphic HUD overlays, SF Pro typography).
What is your Tone of Voice? (e.g. premium, playful, disruptive, corporate)	Visionary, rigorous, deep-tech, precise, disruptive, and authoritative.
Do you have an event campaign tagline?	<i>"Zero Audio Files. 9 Languages. One Unbroken Digital Twin."</i> (Corporate Motto: <i>"We Can Do Everything Related To Software Sector Without Any Excuses!"</i>)

RECORD TITLE	
Do you have a record title in mind? If not, please share as much detail as possible on what you hope to achieve.	"First 9-Language Polyglot Procedural 3D V12 Powertrain & Real-Time Acoustic Digital Twin in a Web Browser" <i>(Alternative / Simplified Title: "First procedural 3D V12 engine digital twin running across 9 programming languages in a web browser")</i>
Are there any specific elements the record title must incorporate? (e.g. a specific product, initiative, format etc.)	1. 9 Programming Languages (Polyglot Core). 2. Procedural 3D V12 Powertrain. 3. Real-Time Procedural Acoustics (Zero Audio Files). 4. Web Browser Environment.
How many people will be participating in your record attempt?	Individual Engineering Feat led by Pavan Kumar Sadashiv (Record Claimant / Lead Systems Architect), supported by HRL International engineering staff, with an on-site cohort of 200+ witness engineers, academic observers, and GWR adjudicators.

CAMPAIGN EXECUTION	
Who are your press targets? (e.g. national media, trade press, local press, international press, influencers etc.)	• Global Tech & Software: Hacker News, GitHub Trending, TechCrunch, The Verge, Ars Technica, IEEE Spectrum. • Automotive & Engineering: Autocar India, TopGear, MotorTrend, SAE International. • National & Business Media: The Hindu, Times of India, YourStory, Analytics India Magazine, Business Standard.
What is your key event campaign narrative? (e.g. first of its kind, bestselling, social impact, etc.)	<i>"From Mangaluru to the World: How a 20-year-old engineering founder synthesized fluid dynamics, 9 programming languages, and 3D graphics into a zero-audio-file digital twin, shattering browser computing limits."</i>
What materials will you be using to communicate with the press? (E.g. press release, media kit, images/video, interviews etc.)	High-impact Press Release, 4K 60FPS video b-roll, interactive browser demo link, cryptographic SHA-256 evidence certificate, high-resolution CAD schematics, and founder interview dossier.
Will there be any Partners or Sponsors onboard? Please detail who they are and their involvement in the project	• Academic & Venue Partner: Sahyadri College of Engineering & Management (SCEM), Mangaluru (auditorium, lab infrastructure, independent academic witnesses). • Corporate Parent: HRL International Private Limited (funding, IP, distribution). • Open to strategic tech/cloud sponsors for global stream syndication.

ADVERTISING CHANNELS & MEDIA PLAN	
What channels will you be advertising on? • Paid social (which platforms) • Search (Google, etc.) • Display/programmatic • Outofhome (OOH) • TV/Radio • Influencer marketing Please share all the relevant details, along with a media plan	• Paid Social: LinkedIn (targeting CTOs, VP Eng, Systems Architects), X/Twitter (developer and tech community), YouTube (tech demos). • Search: Google Ads (targeted keywords: 3D WebGL, procedural simulation, V12 digital twin). • Developer Platforms: GitHub Featured & Trending push, Hacker News Show HN launch, Reddit tech communities (r/programming, r/rust, r/webgl). • Influencer Marketing: Collaborations with tech/coding YouTubers and automotive educators. Media Plan Summary: A 3-phase rollout: (1) 2-week pre-launch teaser campaign; (2) Live global adjudication broadcast; (3) Post-record developer hackathon and open-source challenge.

ENGAGING PARTICIPANTS	
How do you plan to encourage people to participate in your record attempt?	Global open invitation: Anyone worldwide can open the interactive web link on their browser during the attempt, rev the V12 engine, inspect real-time acoustics, and run the automated verification script on GitHub.
How do you intend to engage and reward participants for their contribution to your record attempt?	Every participant and code auditor receives a digital "Official Record Attempt Witness / Participant" badge cryptographically tied to their verification run.
Do you plan to gift participants any giveaways as part of the event?	Yes: Commemorative open-source digital certificates, high-res 3D exploded CAD renders, and limited-edition HRL developer stickers.
Do you want to explore a cobranded merchandise option with Guinness World Records?	YES, absolutely. We are eager to explore official Guinness World Records™ co-branded participant certificates, physical plaques, and commemorative developer merchandise.
Will you be sending a 'Thank you' to participants postevent? Please detail the methods of communication and frequency	Yes: Automated post-event email digest with certificate download links, GitHub release update, WhatsApp/Discord community announcements, and social media celebration videos within 24–48 hours post-event.

TIMELINE & MILESTONES	
Overall Campaign Start and End Date	September 15, 2026 – December 31, 2026
Are there any fixed deadlines you are working towards?	• <i>Codebase & Verification Freeze:</i> September 2026 (Completed). • <i>GWR Fast-Track Review & Commercial Finalization:</i> September – October 2026. • <i>Live Adjudication & Official Record Attempt:</i> October / November 2026. • <i>Post-Event PR & Hackathon:</i> November – December 2026.

BUDGET AND APPROVALS PROCESS	
What is your total budget for the Guinness World Records element of the project? (This includes all advertising associated to the record attempt)	Estimated budget allocation of INR 5,00,000 – 10,00,000 (approx. \$6,000 – \$12,000 USD / £5,000 – £10,000 GBP), dedicated toward GWR Fast-Track commercial assessment, official adjudicator presence on-site/remote, co-branded licensing, event production, and targeted PR syndication.

OFFICIAL SIGN-OFF & CONTACT DETAILS	
Contact Name	Pavan Kumar Sadashiv
Job Title	Founder & Managing Director AI Systems Chief Architect
Enterprise / Company	HRL International Private Limited
Email Address	hrlinternationalprivatelimited@gmail.com
Phone / WhatsApp	+91 72040 65662
Location / Headquarters	Mangaluru, Karnataka, India
